

CAP 7 - A REDE SOCIAL DOS DESENVOLVEDORES

SUBIR SEU SITE NO GIT

Faça o upload de sua atividade na plataforma FIAP ON, na seção de atividades, e aguarde a nota e o feedback do professor.

Agora que você criou sua conta na rede social dos desenvolvedores, o GitHub, chegou a hora de subir o seu projeto com os comandos do git.

Assista novamente os vídeos do Capítulo 7, crie o seu repositório e envie os arquivos do projeto Health Track.

Atenção para a entrega:

Nesta atividade você deverá criar um documento contendo o link do seu perfil no GitHub e a sequência de comandos que você utilizou. Exporte para PDF e faça o upload do arquivo em nossa plataforma.

Dúvidas? Procure-nos no canal #atividades do Slack ou no link "Converse com a gente".

Atividades entregues até 3 dias após o prazo receberão até 70% da nota.

O cálculo é feito automaticamente pelo sistema, o professor não tem controle sobre o percentual da nota atribuída.

Tutorial passo a passo postagem no Git/Github

Passo 1 - Instalação do Git

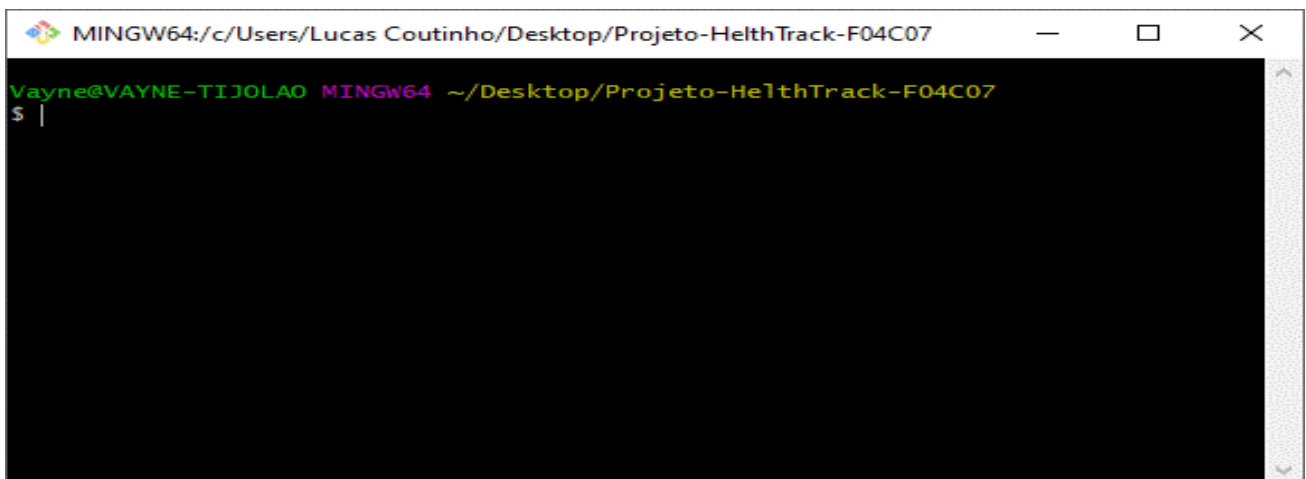

Baixar Pelo link: <https://git-scm.com/>

Fazer a instalação padrão seguindo as recomendações.

Passo 2 – Criar Diretório

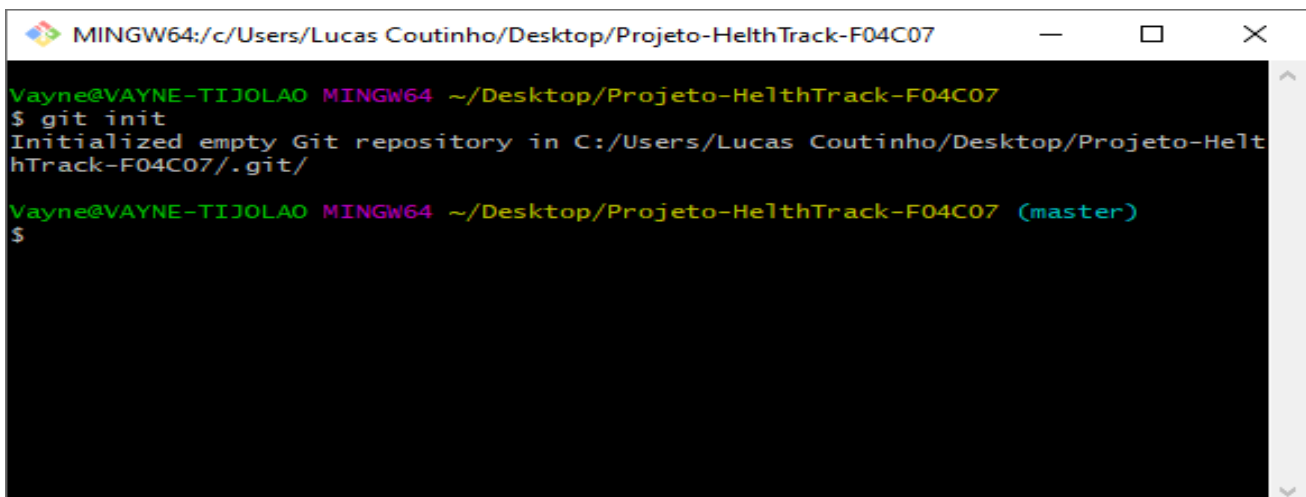

Caminho: [Área de Trabalho/Projeto-HelthTrack-F04C07]

Clicar dentro da pasta do Projeto com o botão direito e selecionar **Git Bash** para iniciar o terminal.

```
MINGW64:/c/Users/Lucas Coutinho/Desktop/Projeto-HelthTrack-F04C07
Vayne@VAYNE-TIJOLAO MINGW64 ~/Desktop/Projeto-HelthTrack-F04C07
$ |
```

Passo 3 – Inicializar o Repositório “git init”

```
MINGW64:/c/Users/Lucas Coutinho/Desktop/Projeto-HelthTrack-F04C07
Vayne@VAYNE-TIJOLAO MINGW64 ~/Desktop/Projeto-HelthTrack-F04C07
$ git init
Initialized empty Git repository in C:/Users/Lucas Coutinho/Desktop/Projeto-HelthTrack-F04C07/.git/
Vayne@VAYNE-TIJOLAO MINGW64 ~/Desktop/Projeto-HelthTrack-F04C07 (master)
$
```

Após isso e criado uma pasta oculta dentro do diretório:

Passo 4 – Arquivo “.gitignore”

Foi criado o arquivo “.gitignore” para ignorar alguns tipos de arquivos, eu usei o site <https://www.toptal.com/developers/gitignore> para gerar um arquivo configurado Windows-Git.

Passo 5 – Configurando Nome e Email do usuário editor

```
MINGW64:/c:/Users/Lucas Coutinho/Desktop/Projeto-HealthTrack-F04C07

Vayne@VAYNE-TIJOLAO MINGW64 ~/Desktop/Projeto-HealthTrack-F04C07 (master)
$ git config --global user.name "Lucas Coutinho"

Vayne@VAYNE-TIJOLAO MINGW64 ~/Desktop/Projeto-HealthTrack-F04C07 (master)
$ git config --global user.email "lucascgs1@hotmail.com"

Vayne@VAYNE-TIJOLAO MINGW64 ~/Desktop/Projeto-HealthTrack-F04C07 (master)
$ git config user.name
Lucas Coutinho

Vayne@VAYNE-TIJOLAO MINGW64 ~/Desktop/Projeto-HealthTrack-F04C07 (master)
$ git config user.email
lucascgs1@hotmail.com

Vayne@VAYNE-TIJOLAO MINGW64 ~/Desktop/Projeto-HealthTrack-F04C07 (master)
$ |
```

Passo 6- Status do diretório/ Reconhecendo os novos arquivos

```
MINGW64:/c:/Users/Lucas Coutinho/Desktop/Projeto-HealthTrack-F04C07

Vayne@VAYNE-TIJOLAO MINGW64 ~/Desktop/Projeto-HealthTrack-F04C07
$ git init
Initialized empty Git repository in C:/Users/Lucas Coutinho/Desktop/Projeto-HealthTrack-F04C07/.git/

Vayne@VAYNE-TIJOLAO MINGW64 ~/Desktop/Projeto-HealthTrack-F04C07 (master)
$ git status
On branch master

```

Pronto terminei as alterações no git agora quero subir no git hub.

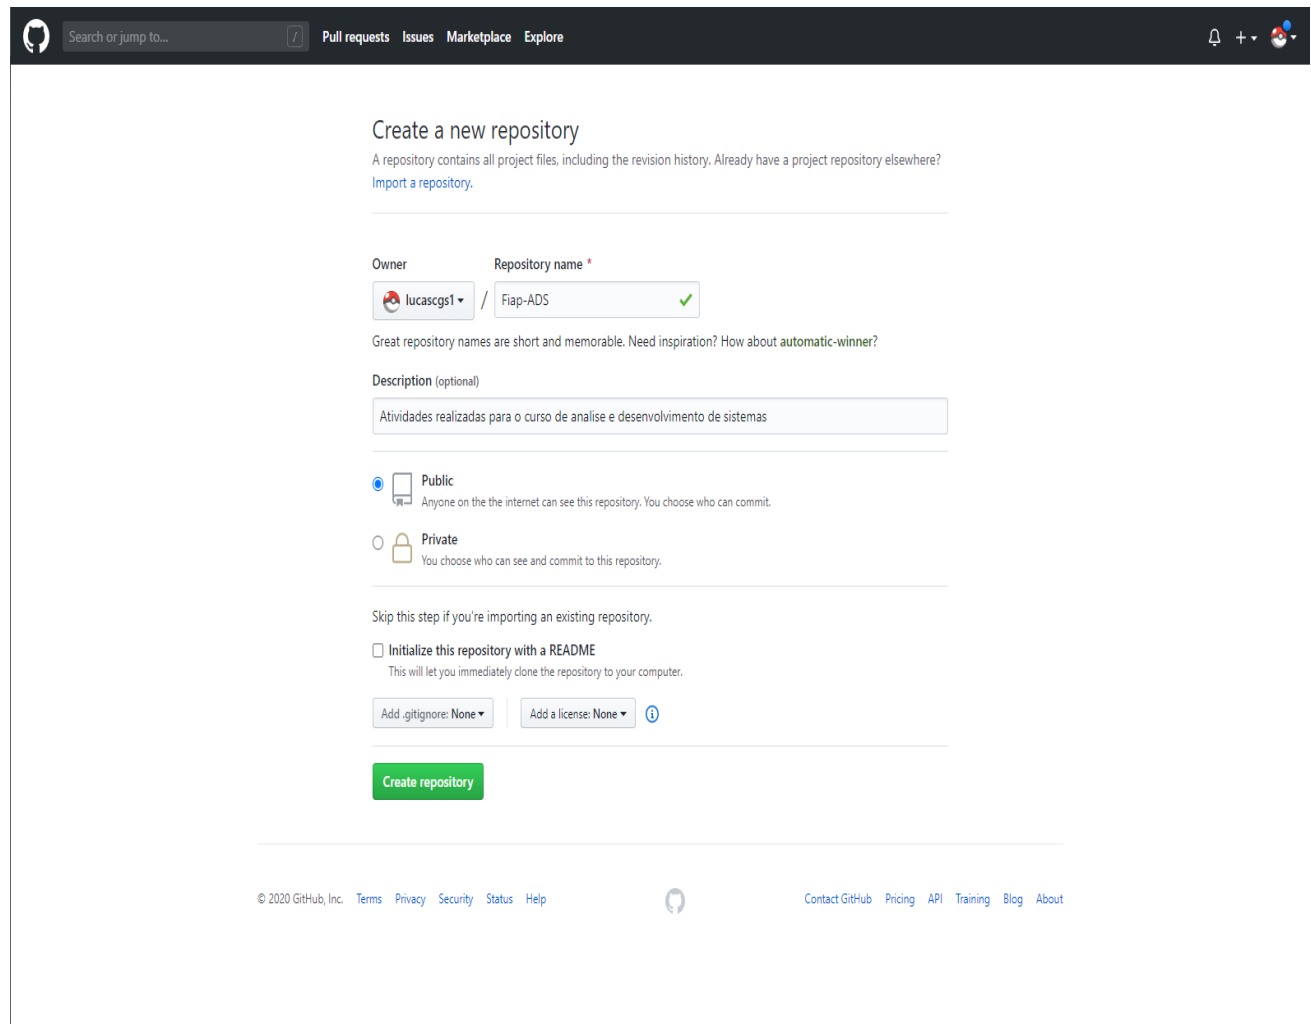

Passo 15 – Acessei o meu perfil do Git <https://github.com/lucascgs1>

Selecionar a guia “Repositories” e Clicar em “New”

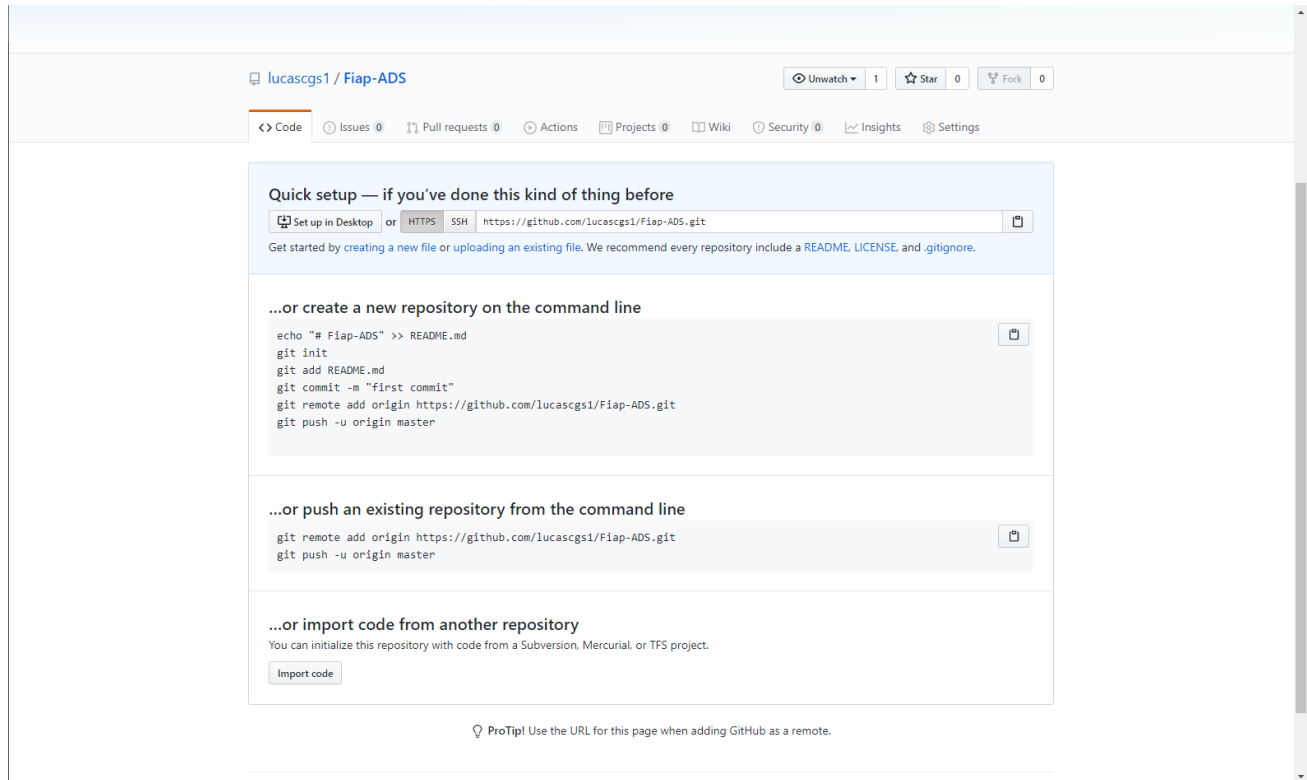

Passo 16 – Criando um Repositório

Foi informado o nome, definido com público e selecionado “*create repository*”

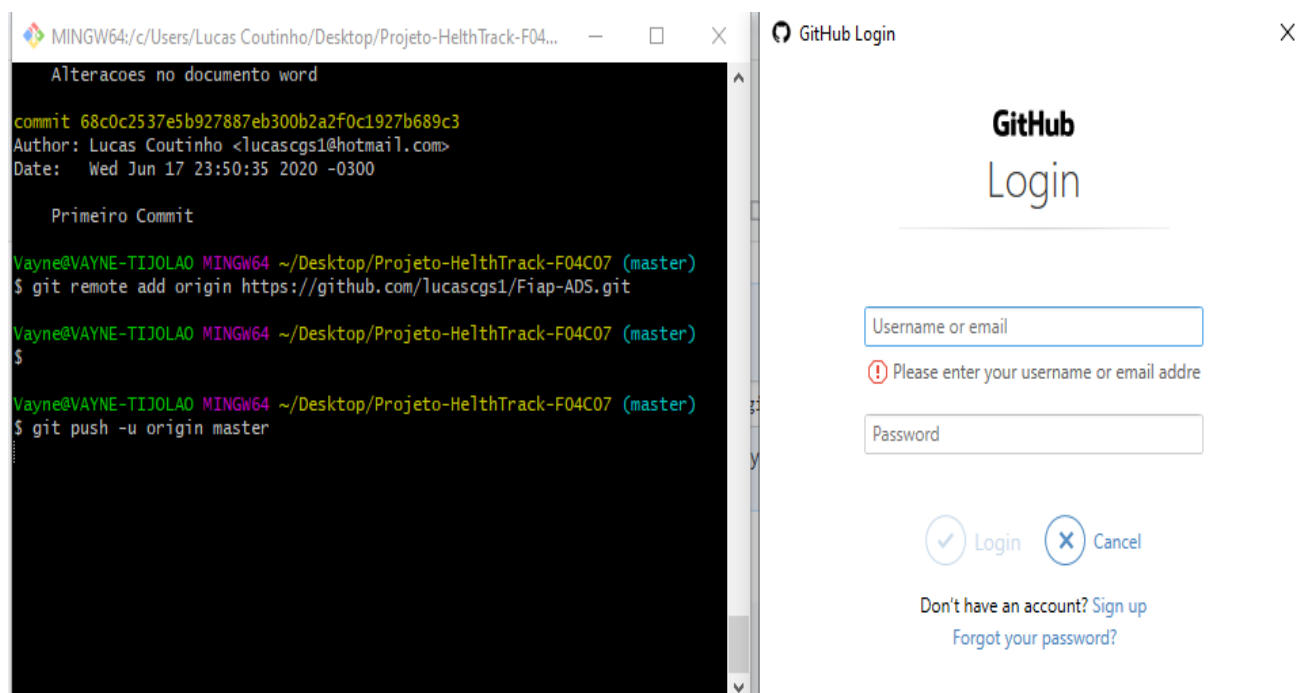

Passo 17 – Subindo meu Git no Git hub

Depois que for criado vai abrir essa tela e e selecionado a opção **“or push existing repostiry the command line”** clicado no botão copiar e colado no git.

Depois disso vai aparecer uma tela de login, para vincular seu git ao git hub.

Depois de logar sua conta ele vai subir seu arquivo no Git hub:

```

MINGW64:/c/Users/Lucas Coutinho/Desktop/Projeto-HealthTrack-F04...
Vayne@VAYNE-TIJOLAO MINGW64 ~/Desktop/Projeto-HealthTrack-F04C07 (master)
$ git push -u origin master
Enumerating objects: 95, done.
Counting objects: 100% (95/95), done.
Delta compression using up to 12 threads
Compressing objects: 100% (92/92), done.
Writing objects: 100% (95/95), 3.14 MiB | 2.34 MiB/s, done.
Total 95 (delta 21), reused 0 (delta 0), pack-reused 0
